

TURBOCAT™

Professional transcription and realtime software

If you're looking for a powerful, flexible transcription tool that lets you produce high-quality, professional transcripts in less time, then TurboCAT™ is the system for you! TurboCAT combines speed, simplicity, and a comprehensive suite of features to help court reporters and transcriptionists meet the exact needs of their customers - from precisely formatted, cross-indexed legal documents to searchable, audio-linked realtime transcripts.

Speed

From its very beginning, TurboCAT has been designed for speed. From the speed of translation to the power and efficiency of the transcript editor to the first 24 hour technical support hotline in the industry. Every feature and design element incorporated into TurboCAT has been to help you do more in less time.

TurboCAT's efficient, compact dictionary design has consistently provided the fastest translation rate available. Customizable hotkeys let you perform complex editing functions with the single press of a key. Keyboard-based editing (both computer keyboard and steno keyboard), lets you maximize your hard-earned skills while working at the computer. And, just as important, TurboCAT's intuitive interface eliminates needless overhead making it easy to learn and use right out of the box.

Editing Environment

TurboCAT's WYSIWYG transcript editor is a feature-rich editing environment designed solely to create high-quality, precisely-formatted, professional verbatim transcripts as efficiently and quickly as possible.

Virtually every aspect of the transcript editor is fully customizable to fit your exact needs. Record custom macros to perform complex editing procedures with one keystroke. Design title and certificate page templates

with custom pick lists. Remap your computer keyboard so any key can perform any function. You can even get eliminate the computer keyboard altogether and perform all transcript editing directly from your steno machine. And because one steno stroke can be defined as any possible combination of computer key strokes, the number of custom editing functions is unlimited.

Realtime

TurboCAT is the CAT system of choice for leaders in the field of realtime transcription. TurboCAT has the most complete suite of realtime features available, including Intelligent Conflict Resolution, Intelligent Number Formatting, Smart Word Endings, and full transcript editing from the steno keyboard.

And, of course, TurboCAT outputs to all major Computer Integrated Courtroom systems including Cheetah International's Total Access™ for Windows

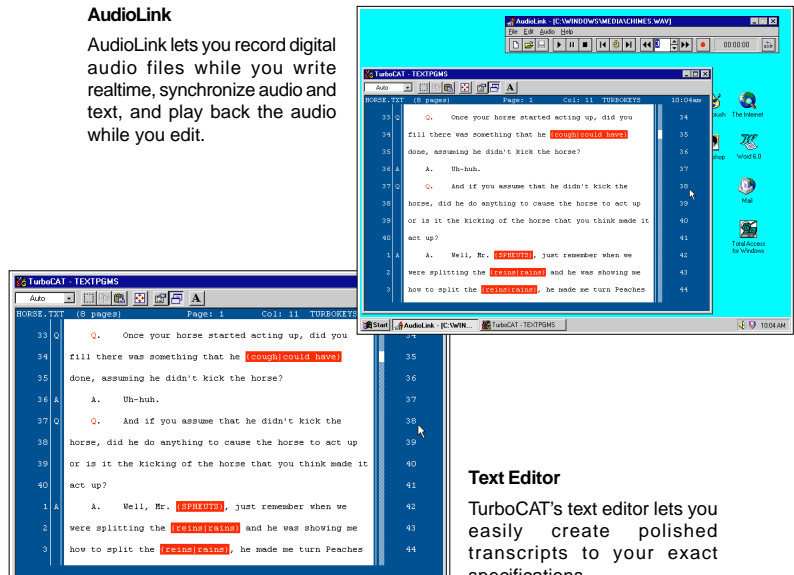

Audio Support

TurboCAT's integrated audio recording utility, AudioLink™, works behind the scenes while you write realtime, using equipment built into your computer, to create a digital audio recording of any proceedings.

Because the text and audio are automatically synchronized, you can use the audio file when putting the finishing touches on your final transcripts, double-checking the recording to ensure complete accuracy.

AudioLink

AudioLink lets you record digital audio files while you write realtime, synchronize audio and text, and play back the audio while you edit.

Text Editor

TurboCAT's text editor lets you easily create polished transcripts to your exact specifications.

TURBOCAT™
